Neighborhood Greenways are safe and healthy neighborhood streets.

Greenways are great for children walking to school and people of all ages who want to have a healthy way to get around their neighborhoods and across streets to places they want to go -- shopping, parks, schools, transit, community centers.

People can park cars and emergency and service vehicles use Greenways.

Greenways slow traffic and help people who walk or bike safely get across streets.

The biggest costs of Greenways is building safe ways across busy streets the require traffic lights or concrete islands.
